WE ADD VALUE

ANCA Manufacturing Solutions have the equipment and capabilities to manufacture a diverse range of products for all industries. When our customers come to us with a request we are proud to find them a solution.

Our experienced team use proven manufacturing processes and design concepts to ensure high quality products. We approach new product developments with cross functional team based principles.

Our agile thinking is coupled with a culture of lean manufacturing that ensures efficient, cost effective solutions that are delivered on time.

We are proud of our strong team whose skills range from CAD design and CNC programming to laser and waterjet cutting sheet metal, CNC forming, welding and painting and assembly.

Partnering with us removes your supply chain risk and offers the knowledge that we will supply a quality to your specific requirements, on time. At ANCA Manufacturing Solutions we guarantee a number one lifetime customer experience every time.

ANCA Manufacturing Solutions is ISO 9001:2015 and ISO14001:2015 certified.

OUR CAPABILITIES

Fiber Laser cutting capabilities up to 20mm thick for steel, 10mm for SUS/ AL. Tube laser can cut steel tubes up to 150x150 mm.

Waterjet Cutting machine capabilities up to 100 mm for steel, Stainless, Aluminium and Polycarbonate material.

Pressbreaks can fold up to 3m long, max 15 mm thick for steel. CNC rolling from radius 60-1500 mm, max thickness 4 mm for steel.

Weld Steel, Stainless, and Aluminum, with over 30 MIG/TIG machines. In-house welding jig design capabilities.

Automotive quality wet paint booth can handle parts up to 2m tall. External suppliers for a wide variety of industrial coatings.

High Quality Mechanical Assembly per customer specified torque control.

High pressure cabinet leak test stations with overhead gantries.

We support a variety of packing standards based on customer requirements.
