

SAME DESIGN, STRONGER BOTTOM LINE

FROM CAD TO COMPLETION

You've already engineered a product the market loves. The challenge now is building it at the right cost and scale without compromising on the design and quality that defines your brand.

ANCA Manufacturing Solutions exists to help you meet that challenge. We protect the quality stamped on your name while unlocking Southeast-Asian efficiencies that drop straight to your profit line.

Maintain your specifications. Improve your margins. Scale globally.

We're here to fuel your next stage of growth.

ANCA MANUFACTURING SOLUTIONS IS YOUR PARTNER FOR **AFFORDABLE QUALITY MANUFACTURING**

At ANCA Manufacturing Solutions (AMS), we're more than a manufacturer—we're your partner in delivering smart, flexible, and high-quality production solutions. Whether you're scaling output, optimising cost, or seeking a trusted build-to-print supplier, AMS brings the capability, experience, and service focus to help your business thrive.

Backed by the global strength of the ANCA Group, AMS operates across two integrated manufacturing sites—a state-of-the-art facility in Thailand and a precision machine shop in Melbourne—offering unmatched flexibility in lead time, capability, and pricing.

For over 50 years, the ANCA Group has been a global leader in high-tech manufacturing. AMS gives you direct access to this world-class ecosystem:

- Australia's most precise machine shop
- Over 80 engineers in mechanical, software, systems and automation
- A global network of 15 advanced manufacturing and support facilities
- State-of-the-art automation and digital manufacturing infrastructure
- Expertise in motion systems, control electronics, and embedded software
- A culture of technology, innovation, and long-term partnerships

WHY PARTNER WITH AMS

End-to-End Manufacturing Capability

From high-precision machining to complex mechanical and electronic assemblies, AMS delivers complete manufacturing solutions tailored to your needs—underpinned by deep engineering know-how and scalable infrastructure.

Global Reach with Local Responsiveness

Leverage the best of both worlds: local project support and engineering with global manufacturing scalability. AMS delivers cost-effective, high-quality results with the responsiveness and transparency customers expect.

Part of a World-Leading Engineering Group

AMS draws on the capabilities of the ANCA Group—globally recognised for expertise in precision engineering, automation, motion systems, software, and electrical integration. This gives our customers a powerful edge in tackling complex manufacturing challenges.

A Commitment to Sustainability

AMS is proud to be launching a group-wide sustainability report, built on science-based targets to reduce our carbon footprint by 42% by 2030.

Our commitment to sustainable manufacturing is part of our long-term partnership promise—delivering not only efficiency and quality, but also environmental responsibility.

CAPABILITIES THAT TURN DRAWINGS INTO DELIVERABLES

CNC Machining: Multi-axis milling, turning, boring, grinding (to ± 0.001 mm)

Cutting & Forming: Fiber/tube laser, waterjet, servo press brakes, rolling

Fabrication & Welding: 30+ MIG/TIG bays, robotic welding

Precision Metrology: CMM, roundness & form checks (to 0.0002 mm), 3D scanning

Surface Finishing: Automotive-grade 2-pack paint, wet paint, powder/epoxy coating, cosmetic QA

Electronics & Software: High-speed SMT, PCB design & validation, embedded firmware, UI integration

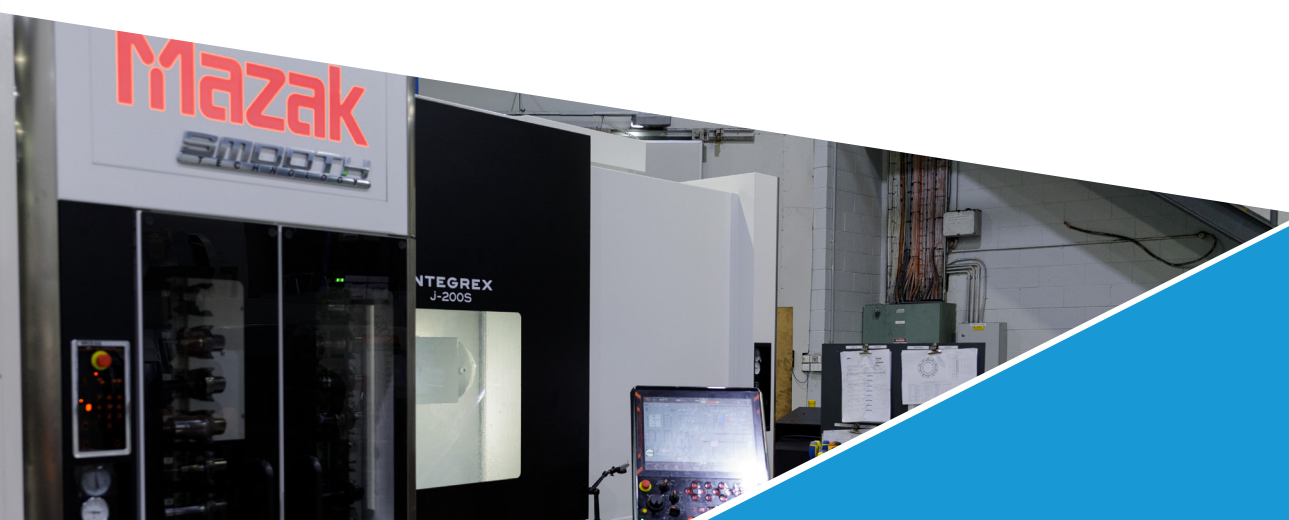

Mechanical & Electrical Assembly: Micron-level builds, box-build ready, electronic integration

Automation Solutions: Robotics and motion systems design and integration

Production Engineering: Design and scale-up of automated manufacturing lines

Design, Testing & QA: CAD design, Leak testing, fit/form/function verification

Logistics & Support: Global freight, container packing, drop-ship, VMI, after-sales and field support

INDUSTRIES WE EMPOWER

MINING

AGRICULTURE

4X4 & OFFROAD

ELECTRICAL
CABINETS &
ENCLOSURES

ENERGY

IMMEDIATE **VALUE DRIVERS**

Lower Costs – Achieve savings without redesigning your product

Flexible Capacity – Dual sites under one quality framework

Faster Market Access – Thai hub reduces lead times and import duties across Asia

IP Protection – Secure systems with NDAs and controlled data access

Consistent Quality – Australian oversight and ISO-certified processes

Ethical Operations and ESG Support – Zero-tolerance for corruption; full compliance with Modern Slavery Acts; Scope 3 data available for sustainability reporting
